

## testimonials

"I would like to thank Bowhill Engineering for their professionalism in the way they managed and coordinated the work between all 3 companies and the transport company... I would have no hesitations in recommending them to other future customers..."

*Graeme Bower - Project Manager*

CHAY Hopper Sub Assemblies

Bluebird Rail Operations

"Every one from the Managing Director to the staff on the shop floor genuinely took pride in what they were producing and consistently projected an "Attitude of Excellence" in all that was achieved. "

*David Evans- Project Manager*

Olympic Dam Tails Leach Tank 3 Upgrade

Built Environs

"...during our involvement we have enjoyed a very positive experience... high standard of supply of manufactured structural steel... timing and amount of fabrication was substantial, the whole group worked well together..."

*Guido Moltoni - Project Manager*

Mindarie Zircon Mine Construction Project

RJ Robbins & Associates

"The steelwork component of these projects (Lock 7,8,9,10,1) was very technically challenging as many aspects were new in both their structural design and application....York Civil were impressed with and appreciative of the cooperative approach they took with the project. The quality of work produced was excellent, and they were a major part in ensuring the successful completion of a difficult project... The results achieved...has provided a positive impression for York Civil - company wide... It is clearly evident that the attitude of both the company as a whole and the individuals focused on producing an atmosphere and approach which encourages cooperation, innovation, and friendly interaction between all parties".

*Michael Hyde - Project Manager*  
SA Water Lock & Weir Projects  
York Civil

"The manufacture of the Removable Deck Units (RDU's) was one of the most challenging modules of work in this Project. The design, even when complete was really a well worked concept. Bowhill Engineering's ability to model the RDU's in their full operational mode overcame all of the potential problems and the deck installation was seamless. Given the distance from the factory, variety of coatings and the size of the RDUs any rework would have been costly, particularly in terms of time lost to the project program".

*Allan Mattner - Project Manager*  
Lock & Weir Projects  
SA Water

"...I must also commend all concerned for the delivery of a product of a high quality of workmanship..."

*Daniel Raschella - Plant & Equipment Assistant Manager*  
Trimm Line Mezzanines  
GM Holden

"...They have the ability to: ...achieve very ambitious deadlines...pursue innovative & daring ideas to resolve challenges...have a constructive & cooperative approach to the client's requirements..."

*Alex Nadasan - Project Manager*  
Riverbank Pedestrian Bridge  
Built Environs

"...the structural steelwork installation went smoothly and resulted in a quality end product, testimony of careful detailing and planning by Bowhill..." "They have proven themselves more than capable on the complex State Library of SA project and the difficult Tea Tree Gully Library Relocation". "...they excelled at producing quality shop drawings and product within nominated time frames..."

*Malcolm Mayfield & Ed Alarcon - Project Managers*
