ESSENTIAL DUTIES & RESPONSIBILITIES:

1. Production

- In conjunction with Production Team Leader, coordinates fabrication activities and follows production priorities for products in keeping with effective operations to achieve the best timeframe and cost outcome.
- Confers with Production Team Leader to establish production and quality control standards.
- Inspects work in progress and finished products to ensure that production is in line with quality standards.
- Develops and implements operating methods and procedures in consultation with Production Team Leader to minimise operating problems and improve product quality.
- Recommends measures in consultation with the Production Team Leader to improve production methods, equipment performance and quality of product.
- Assists processing employees to complete work of a hands on nature as projects may necessitate, without detracting from the core requirements of the position.

2. Communication

- Analyses and resolves work problems or asks for assistance of peers in solving problems
- Participates openly and effectively in support of Team objectives
- Interprets company policies and procedures to workers and enforces safety regulations.
- Works with a team-building and continuous improvement attitude.
- Establishes and maintains effective communication systems ensuring compliance with all company policies and procedures.

3. Administration

- Provides production data such as required for the daily time sheet information.
- Ensures security of company equipment ensuring that items are stored and the premises are locked up and shut down according to company procedures.

4. Occupational Health, Safety and Welfare

- Complies with safe operating practices and procedures in line with relevant statutory requirements.
- Ensures all duties are performed in a safe manner in line with safe operating practices and procedures including the use of personal protective equipment.
- Reports all incidents, accidents and near misses following in house procedures.
