To whom it may concern,

Over the past five years, F. A. Miller & Son Pty. Ltd. have utilised Bowhill Engineering on numerous occasions to provide fabrication, sandblasting and/or painting services for various projects.

Since March last year Bowhill Engineering have fabricated in excess of 30 Drive-over Hopper & Stacker chassis, with the associates ramps and truck gates, for the bulk handling of grains which has amounted to approximately 320 tonnes of complex steel fabrication. In addition to this fabrication Bowhill Engineering have sandblasted & painted conveyor tubes, Drive-over Hopper & Stacker steelwork and castor units. They have provided delivery between *FAMSON's* two sites and, when required, to other contractors.

During our association we have found Bowhill Engineering to be a reliable contractor delivering quality workmanship within tight time constraints and proving to have dependable problem solving skills. We look forward to a continuing mutually beneficial business relationship.

As such, we have no hesitation in recommending Bowhill Engineering for any projects in this field and would wish them all the best for their future endeavors.

Yours sincerely

Frank Miller
Managing Director
